Water Order 2021

NOTICE TO STATE WATER PROJECT CONTRACTORS

Date: DECEMBER 1, 2020

Number: 20-06

Subject: 2021 State Water Project Initial Allocation – 10 Percent

From:

Ted Craddock

Ted Craddock
Deputy Director, State Water Project
Department of Water Resources

The Department of Water Resources (DWR) is initially approving 422,848 acre-feet (AF) of Table A water for the long-term State Water Project (SWP) contractors in 2021. SWP supplies are projected to meet **10 percent** of most SWP contractors' requests for Table A water, which totals to be 4,172,786 AF. Attached is the initial 2021 SWP allocation table.

This initial allocation is made consistent with the long-term water supply contracts and public policy. DWR's approval considered several factors including existing storage in SWP conservation reservoirs, SWP operational constraints such as the conditions of the 2019 Biological Opinions for federally-listed species, the 2020 Incidental Take Permit for State-listed species and the 2021 SWP contractors' demands. DWR may revise this and **any subsequent allocations if warranted by the developing hydrologic and water supply conditions.**

To develop the 10 percent schedule, DWR will scale down the current long-term SWP contractors' 15 percent schedules that were submitted in October 2020 (as part of the initial requests), unless SWP contractors submit updated schedules. DWR will send the approved monthly water delivery schedules to the long-term SWP contractors.
