A Retrospective Story

100% Allocation Year

First Time in Nearly Two Decades

10,000

Acre-feet per Year

Ventura 20-Year Water Transfer

2023 - New Mission/Vision/Values

Mission

San Geronio Pass Water Agency supports the region's quality of life through sustainable water management.

Vision

San Geronio Pass Water Agency aims to provide water security that meets the regional needs of an evolving landscape, transcending boundaries to work toward common goals, create synergy through collaboration and ensure an adequate water supply today and in the future.

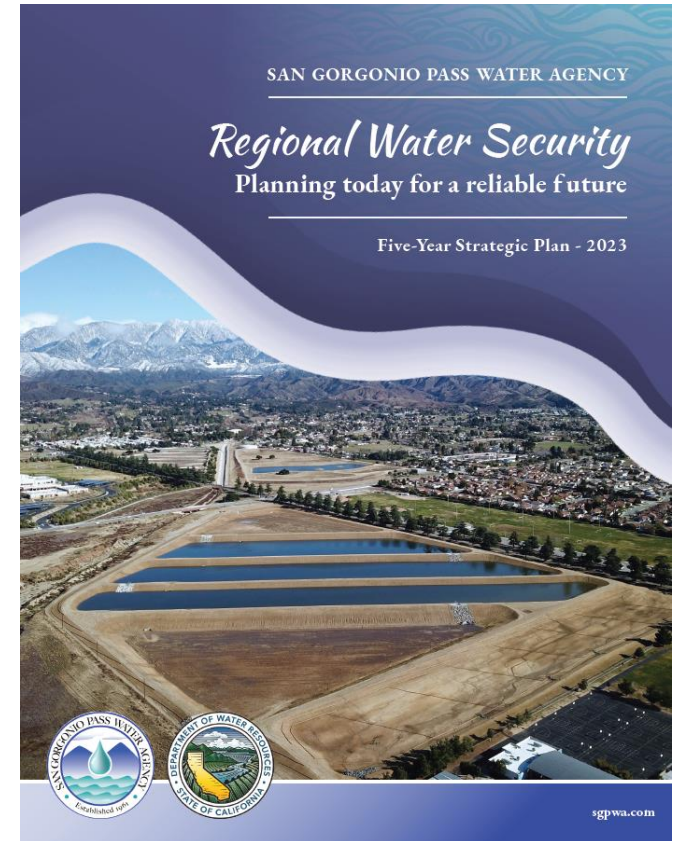

Values

Collaborative
Reliable
Responsive

Innovative
Accountable
Trustworthy

Sustainable
Forward-focused

Closed on Brookside West

How cloud seeding works

1

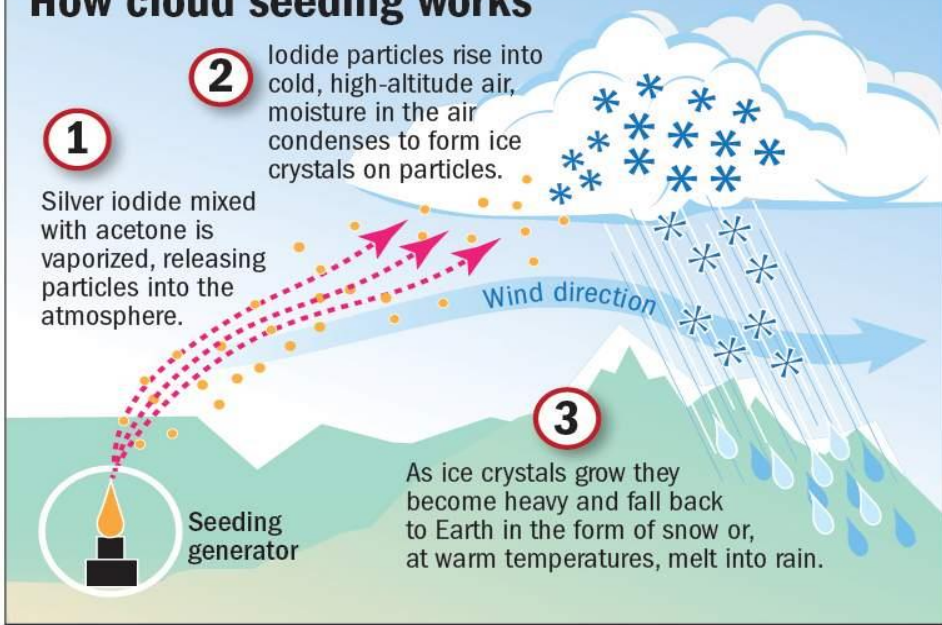

Silver iodide mixed with acetone is vaporized, releasing particles into the atmosphere.

2

Iodide particles rise into cold, high-altitude air, moisture in the air condenses to form ice crystals on particles.

3

As ice crystals grow they become heavy and fall back to Earth in the form of snow or, at warm temperatures, melt into rain.

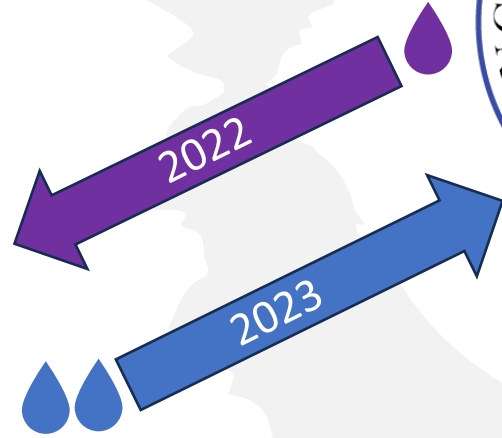

Cloud Seeding (Weather Modification) Pilot Project Installed

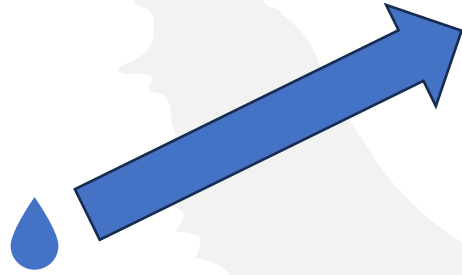

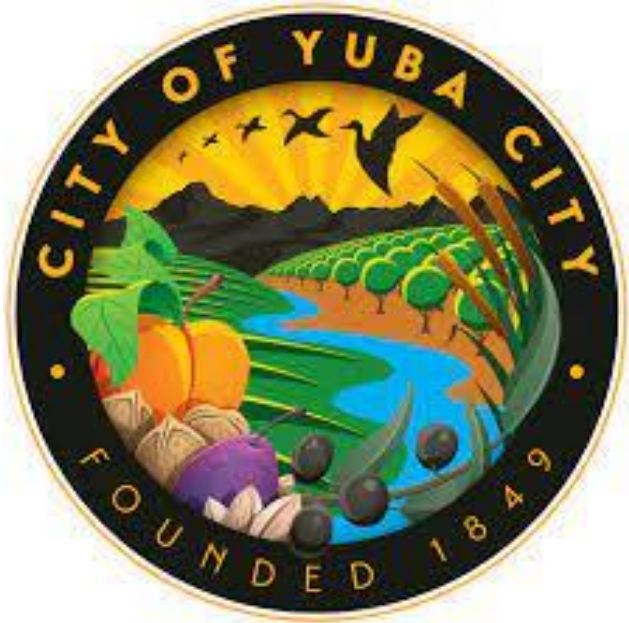

Letter of Interest

Expressing Agency's desire
to participate at **80,000**
acre-feet of storage in
AVEK's High Desert Water
Bank Phase II

2022 CCWA Transfer Yields a Potential 10 to 1 Return in 2023

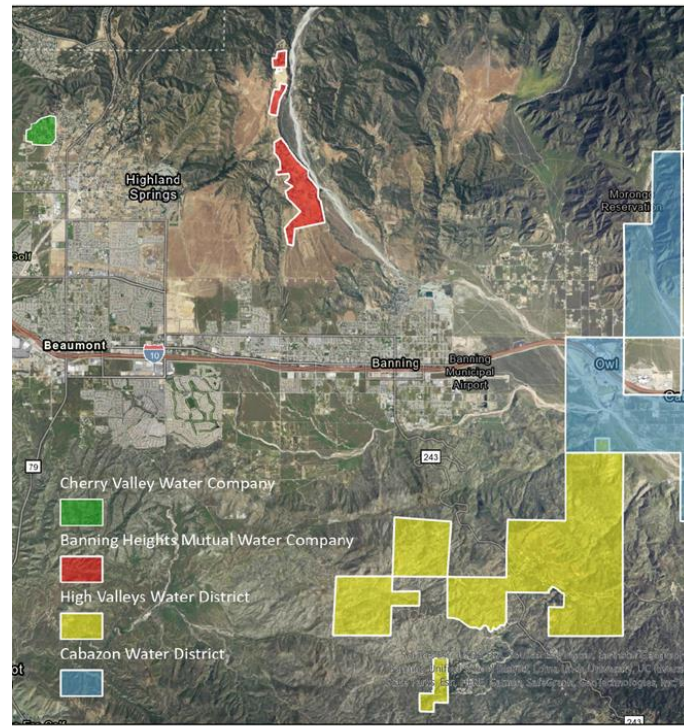

Utilizing the water purchase fund, SGPWA purchased 495 acre-feet from the City of Yuba City

Delta Conveyance Final EIR just released on December 8, 2023

Office of the Governor of California
@CAGovernor

Climate change is threatening our access to clean drinking water – doing nothing is not an option.

This new approach to the Delta Conveyance Project, redesigned following community & environmental input, is how we build a California of the future.
