

NOTICE TO STATE WATER PROJECT CONTRACTORS**Date: December 1, 2023****Number: 23-09****Subject: State Water Project Initial 2024 Allocation of 10 Percent**

Ted Craddock
Deputy Director, State Water Project
Department of Water Resources

Water year 2023 provided much-needed relief following three of the most severely dry years on record. However, water year 2024 is off to a slow start with precipitation amounts at about half of average in October and November. To make the initial 2024 allocation, the Department of Water Resources (DWR) forecasts what water supplies will be available if the current dry pattern continues through the remainder of the water year 2024. As a result, DWR is initially allocating 10 percent of most State Water Project (SWP) contractors' requested Table A amounts for 2024, as shown in Attachment A – 2024 SWP Allocation. The dry start to this year is a reminder that we must continue to prepare for swings between wet and dry conditions.

To determine the available SWP water supplies, DWR considers factors including SWP contractors' anticipated 2023 carryover supplies into 2024, projected 2024 demands, existing storage in SWP conservation facilities, estimates of future runoff, SWP operational and regulatory requirements from the Federal Endangered Species Act and California Endangered Species Act, and water rights obligations under the State Water Resources Control Board's authority. DWR may revise the SWP allocation if hydrologic conditions change.

DWR will develop the 10-percent water delivery schedules by prorating the 15-percent schedules submitted by the Contractors in October 2023 (as part of initial requests) with any subsequent updates. If a contractor foresees any changes to their water delivery schedule, please communicate such changes to DWR in a timely manner.

If you have any questions or need additional information, please contact John Leahigh, Assistant Division Manager, Water Management, SWP Division of Operations and Maintenance, at (916) 902-9876.
